gasanamous@gmail.com

MIKROTIK & ISP
NETWORKS

- MikroTik RouterOS & Firewall
- PPPoE Server & Client Setup
- UISP & RADIUS Integration
- Bandwidth Queues & Throttling
- NAT, Mangle & Routing Rules
- VLAN & Subnet Isolation

ROUTING & SECURITY

- Cisco Switches & Routers
- Router-on-a-Stick (Dot1Q)
- Extended Access Control Lists
- TCP/IP, Dynamic DHCP & DNS
- Port Security & Firewalls

SURVEILLANCE & VOIP

- IP Cameras & NVR/DVR Setup
- ONVIF & RTSP Protocols
- Hikvision Design Tools
- PoE Budget & Storage Math
- Asterisk & FreePBX/Issabel
- Yeastar Gateways & SIP Trunks

INFRASTRUCTURE

- Linux & VMware Admin
- Docker Containerization
- Nginx & VPS Setup
- Cat6 & Fiber Optic Cabling

AUTOMATION & CODE

- Node.js & Express.js
- JavaScript & Zod
- PostgreSQL & MySQL
- Oracle APEX & PL/SQL

Ghassan Amous Curriculum Vitae

PROFESSIONAL PROFILE

Results-driven Network & Infrastructure Engineer with hands-on experience in ISP subscriber management, MikroTik firewall configuration, PPPoE authentication, VLAN topology design, and IP surveillance infrastructure. Skilled in configuring Managed Switches, Cisco Routers, Extended Access Control Lists (ACLs), and IP Telephony (VoIP/PBX) systems. Combines networking expertise with system administration and scripting to automate infrastructure and manage multi-tenant network hardware.

WORK EXPERIENCE

Network & Infrastructure Engineer Jul 2025-Present
Al-Ghadiya Technology Services | Tulkarm, Palestine

- **MikroTik & Subscriber Management:** Configured MikroTik Routers for PPPoE server authentication, firewall filter rules, NAT, and dynamic bandwidth queueing for home subscriber routers.
- **ISP & UISP Integration:** Managed ISP subscriber connectivity using UISP hardware and RADIUS, regulating subscriber provisioning, PPPoE credentials, and automated billing workflows.
- **Network & Security Architecture:** Architected and deployed isolated VLAN topologies and subinterfaces (Router-on-a-Stick) to segment data, voice, and surveillance camera traffic.
- **Access Control & Firewalls:** Configured Extended Access Control Lists (ACLs) on Cisco edge routers for firewalls and strict inter-VLAN access regulation.
- **IP Surveillance Infrastructure:** Designed and installed end-to-end IP surveillance setups, NVR/DVR storage, and PoE power budgets using Hikvision System Design tools.
- **VoIP & Telephony Systems:** Built and supported enterprise VoIP IVR solutions and PBX trunk routing using Asterisk, FreePBX, and Issabel.
- **Datacenter & Cabling:** Managed Linux and VMware server virtualization, Docker deployment, and structured datacenter Cat6/Fiber cabling.

KEY INFRASTRUCTURE PROJECTS

- **Multi-Tenant ISP PPPoE & Controller Platform:** Integrated cloud subscriber billing and tenant licensing with physical UISP wireless stations, MikroTik gateways, and RADIUS authentication servers.
- **Network & CCTV Topology Simulation (Packet Tracer):** Designed multi-site network architecture featuring VLAN isolation, inter-VLAN routing, dynamic DHCP pools, and ACL firewall security.
- **Enterprise Automated IVR Telephony Infrastructure:** Implemented complete VoIP telephony solutions using Asterisk and FreePBX with IVR flow automation and Yeastar gateways.
